Enriching Learning:

Seeking to be Complete

Education has to prepare the students to face with the challenges of global competition. Moreover, Higher education gives you the path for intellectual journey. In this connection, it is our honor to welcome and introduce you to Texas College of Management and Information Technology (TCMIT). It is a dynamic educational platform, an institute dedicated to shape its students into future managers and /or entrepreneurs par excellence and a vision for tomorrow's need.

Education cannot be confined to the narrow periphery of bookish knowledge; it transcends the narrow barriers of geography, culture and the nation and moves to the open path of perfection. In this regard, our BBA, MBA, BIT, BCS (NT & CS), BHM & MCS curricula, under Lincoln University, Malaysia- an international platform for world standard higher education, not only focus on providing expertise in theoretical aspects but also emphasize on ensuring the right corporate and technical exposure. Our faculty comprises of experts, both from the education and corporate world who create/nurture professionals from students. A novel academic life of joy, happiness and creative knowledge awaits the student at Texas.

Texas College is just a culmination of diverse experiences, each enriching you in its own way. And every day there is a new one waiting to unfold, giving you opportunity to learn, relearn and unlearn. Whether it is in the classrooms, at the enriching events, or in solitude deep down inside you, we want to turn hours, minutes and seconds into your favor. Make them count. You are ambitious and seek to be whole. And at Texas you will find that new perspective to look at all that you are and all that you wish to be. You open up to a new learning; you open up to a new way of life.

PROF. DR. KESHAV KUMAR SHRESTHA
Chairman

Message from the Desk of Chief of Academics

It gives me an immense pleasure at this moment, to welcome at Texas College of Management and Information Technology (TCMIT), all prospective but qualified, meritorious and hardworking students who would like to be distinctly unique in their chosen field of future career.

Education has remained a core concern in the history of human civilization from time immemorial. If there had been any shift it is only in the focus and emphasis as per the urgency and the emerging needs of the society. In congruence to this, TCMIT a brain child of academicians, professionals, and people from corporate world and social service sectors was formally created in the year 2014, to impart globally accredited academic programs under the affiliation of Lincoln University College, Malaysia. The academic programs currently launched by TCMIT are Master of Business Administration (MBA), Bachelor of Business Administration (BBA), Bachelor of Information Technology (Hons), Bachelor of Computer Science (Hons)(Network Technology & Cyber Security). All the programs are acclaimed and recognized nationally and globally. The college has fifth batch output of MBA students and first batch output of BBA students. All MBA graduates are either self employed or employed and assuming the managerial responsibilities at different organization with commendable success.

Within a very short span of period, TCMIT has garnered reputation for excellence and proven record of student success. The mission of the college has been to equip the students with the competitive skills and knowledge required to place each one of them firmly in highly challenging and competitive edge of world of 21st century. In addition to providing world class academic skills and knowledge, the college also instills the students with the grace and character to become a complete human being. We believe that acquiring of knowledge and skills with right grace and character only will make people able to translate the vision into reality. The blend of quality in knowledge and skills with inbuilt elegance and character has been the prime concern of the college. With these mix of ingredients, we want to prepare and provide qualified and skilled human capital competent enough to create one's own corporate world or serve the existed corporate entities, government agencies and other sectors of the society.

In order to make teaching/learning environment really meaningful and effective and also to prepare the type of human resources as envisaged, the modules that we follow embraces a combination of wide range of teaching methods along with the state of art of classrooms, resource centre and other complementary logistic supports . Modules, thus, include meeting of

the behavioral requirements of the course, the needs of faculties and the learners, and globally tested modern technology based methods. The learning approach at TCMIT is student-centered: participative and interactive. The common teaching methodology however practiced by the college includes lectures (including dual whenever and wherever useful), case studies, seminars, project works, field visits, report writing and presentation. We lay greater emphasis on practical based analytical and real life experiential learning so as to orient the future management graduates about the probable challenges they might face in their future career and impart accordingly the required skills to deal such situations effectively and efficiently. Our graduates' modality of dealing with such situations at this competitive edge of world would be adhering to critical thinking and analytical approach.

One of the important ongoing features inbuilt within our academic programs is that we provide sufficient exposures to our future management graduates about the reality of corporate world and other important sectors of the economy by availing them appropriate platforms, may it be through guest lectures, talk

programs, collaborating with outside organization conducting small research and facilitating them during internship and job placements.

In the end, in this journey of mutuality of academic interests, I personally urge all meritorious students to visit the college, get acquainted with what the college has to offer, meet and interact with the faculties, get answers to every inquisitiveness, if any, you have in mind and join internationally accredited management programs at TCMIT and become the member of LU-TEX family.

'As you think so you become'. Come with your aspirations and full devotion, TCMIT inculcate right attitude in you and commits to explore and release your potentialities to prepare you a complete human being.

See you then at TCMIT with your aspirations and commitment.

Our Support for your Career

Dear Students,

Welcome to Texas!

We are excited to welcome you to our academy. Our goal is to support all students academically and socially. We will make every effort to graduate the students and make them professionally sound, to compete in the increasingly competitive world in which they will live and work. We encourage all students to be responsible, self-reliant and to set high goals for themselves as they reach for their dreams. We have built a solid foundation and now continue to add layers of quality to our institution. We are focusing on increasing the learning environment with optimum use of modern technology & updated pedagogies. We assure all students to have a positive learning experience in future. We strive for excellence in the overall development of students and empower them to be lifelong learners in achieving excellence in their respective career.

This is the time to integrate learning with experiences that prepares students for the future. Get more involved in college activities : be an enthusiastic participant in different curricular and co-curricular activities. We hope you students will get enriching experiences here at Texas College. We are always there with you to support for your enriching experiences.

Better Nexus

Texas College of Management & IT as an integral wing of Texas International Education Network offers internationally accredited BBA, MBA, BIT, BCS (NT & CS), BHM & MCS programmes in partnership with Lincoln University of Malaysia. TEXAS is striving to match the jigsaw of etiquette and values required for forming a complete picture of human. Entering a college like TEXAS you will be embarking a new and critical chapter of real corporate world where we do not focus on grades but the soft skills that one should have in facing the challenging world of today and tomorrow. Discovering new facts, ideas, which we believe will drive and improve the world, collaborating, training, mentoring, building incredible teammates, are at the heart of the TEXAS culture. TEXAS provides immersive class participation through the case methods; unlock the potentiality developing entrepreneurial thinking and knit high achieving academic foundation. It plays role of academic guardian who shares struggles, achievements, failures, celebrations, tears, laughs while building relationships that will undoubtedly last well beyond graduation. Apart from regular studies we are confident in building all-round personality development of students who will take a chance on an idea and to be ready and willing to defend it, change it, reshape it. TEXAS strives to equip future leaders with the competence and character to address emerging global business and social challenges. In fact Texas strikes balance between head (knowledge), hand (skill) & heart (attitude). We urge you to join LU-TEX family for building new career blocks.

Lincoln University College

Lincoln University (Malaysia) was founded in the year 2002, in collaboration with Lincoln Educational Network and other international universities namely: The University of Hertfordshire, U.K, The University of Cambridge, U.K., The Hagga-Hella (University of Applied Science) Finland, University of London, The University of Huddersfield, the UK, Saint Louis University, the US, Presbyterian University, Ghana, Tribhuvan University, Nepal and Southeast University, the US. ISHWAR KARKI
Director
Human Resources at IME Group

"I am with the conviction that degree like BBA and MBA should help the students grow and develop both as a leader and person in a way one could have ever imagined. They should be exposed to the real life scenario to enhance their skills along with the knowledge /insights. There should be personal and professional transformation of one in the field of business management and administration, work with the main management tools and strengthen their managerial skills and competences. During my presence in their seminars, conferences, discussions and activities, as an invitee, I have drawn a conclusion that students are in the safe hand of academicians at Texas and moving towards the right direction of their journey towards professional life. I am always delighted to interact with Texas MBA students who are inquisitive and keen learner."

BIMAL KANDEL
Managing Director
FroxJob Nepal

The fundamental aim of student is to get employment in the reputed company after completion of their undergraduate or graduate degree. Placement cell at various b-schools helps in bridging the crucial interface between the stages of completion of academic program to enter into suitable employment. We, the recruitment agencies collaborate with business schools like Texas College of Management & IT to facilitate students for corporate presentations, CVs screening, job interviews, job fair, HR meet and career planning. On behalf of Frox Job I wish all the students for their employment journey right after or on ongoing semesters.

NARAYAN PRADHAN
CEO & Principal Consultant
Franklin Covey Nepal & Bhutan
